About project

We are undertaking a large-scale terminal and tanks construction project involving bulk liquid storage, fuel terminal infrastructure, bund walls, roads, and associated civil works. We are seeking a Civil Laboratory Technician to support quality assurance in materials testing and site investigations

1.0. Position – Civil Laboratory Technician (1 Post)

1.1. Qualifications: -

- **Diploma/ Bachelor Degree** in Civil Engineering, Construction Technology or any related field.
- 2-3 years experience in a materials testing lab, preferably in industrial or tank terminal construction
- Proficiency in operating laboratory equipment and familiar with testing laboratory equipment and familiarity with testing standards
- Strong organizational and time management abilities
- Familiar with TBS, TANROADS, and international testing standards

1.2. Responsibilities: -

- Perform laboratory and field tests on soils, aggregates, concrete, asphalt, and other construction material
- Conduct tests such as:
 - Soil: compaction, CBR, Atterberg limits, sieve analysis
 - Concrete: slump, casting, curing, compressive strength
 - Aggregates: flakiness index, crushing strength, grading
 - Asphalt/Bitumen: Marshall stability, bitumen content
- Collect, label and store samples from the construction site
- Operate and maintain laboratory equipment (CBR, Proctor, sieves, compression machines)
- Record accurate test data and prepare reports for the QA/QC team
- Ensure testing is done per ASTM, AASHTO, BS, TBS, and TANROADS standards
- Observe strict HSE compliance during testing activities
