EXPERIENCE:

- 3-5 years of experience in security system installation, maintenance, and troubleshooting, preferably in mining environments.
- Hands-on experience with various security systems (CCTV, Electric Fence, access control, intrusion detection).
- Experience working with IP-based Systems and Network Configurations.

ADDITIONAL REQUIREMENTS:

- Electrical and Electronic Proficiency
- Diagnostics and Troubleshooting
- Performing routine Systems Maintenance
- Safety awareness
- Communication and Interpersonal Skills.

MAIN OR KEY ACCOUNTABILITIES:

- Installing security cameras (CCTV systems).
- Perform Regular Maintenance:

- Setting up alarm systems and sensors.
- Configuring access control systems.
- Installing video doorbells and intercom systems.
- Mounting and wiring control panels and keypads.
- Running and concealing wiring or structured cabling for systems.
- Configuring network connections for remote monitoring.
- Testing installed equipment to ensure functionality.
- Installing motion detectors and intrusion detection systems.
- Troubleshooting and repairing faulty systems or components.
- Maintaining and servicing installed security equipment.
- Responding to emergency calls for system malfunctions.
- Performing site surveys to identify potential security vulnerabilities.
- Electric Fence Installation and Repair
- Conducting site surveys to identify security needs and potential vulnerabilities.
- Adjust Camera angles, motion sensitivity and Alarm triggers to specifications.
- Conduct final inspections to ensure systems meet quality standards.
- Secure systems against unauthorized access or tampering.
- Provide on-site training to clients on system operation and troubleshooting.
- Respond to service calls to resolve issues promptly and professionally.
- Diagnose and repair malfunctions in security equipment or software.
- Replace or upgrade outdated components to maintain system integrity.
- Set up user access permissions for access control systems.
- Test newly installed equipment to confirm proper operation.
- Set up and program control panels, keypads, and access control systems.
- Installation of GPS tracking systems
- Attend callouts and standbys.

Should you be asked for money in exchange for a job offer or suspect such activity, please report this immediately to our Security Department, Investigation Unit, by calling **+255 28 216 01 40 Ext 1559** (rates apply) or use our whistle-blowing channels by sending an SMS to **+27 73 573 8075** (SMS rates apply) or emailing speakupAGA@ethics-line.com or use the internet at www.tip-offs.com

VACANCY

ABOUT GEITA GOLD MINING LTD

Geita Gold Mining Ltd (GGML) is Tanzania's leading gold producer with a single operation in Geita Region. The company is a subsidiary of AngloGold Ashanti, an international gold producer headquartered in Denver, USA. AGA has operations in more than ten countries across four continents. The mine is situated in the Lake Victoria Gold fields of Northwestern Tanzania, only about 120 km's from Mwanza City and 20 km's Southeast of the nearest point of Lake Victoria. The company has its main office and operations in Geita, only 5 Km's west of the fast-growing town of Geita, and a supporting office in Dar es Salaam. Applications are invited from ambitious, energetic and performance driven individuals to fill in vacant position(s) mentioned below:

Position:	Graduate Mining Engineer
Contract type & Duration:	Unspecified Time Contract
Department:	Technical Service
Reporting to:	Engineer 3 – Mine Planning
Number of Positions:	One (1)

GGML is an equal opportunity employer: Female candidates are highly encouraged to apply.

PURPOSE OF THE ROLE:

The purpose of this role is to provide day-to-day technical support to the production team, ensuring alignment with the approved mining plans. The role is also responsible for monitoring and verifying the achievement of design parameters related to pits, waste dumps, and other construction projects, while maintaining effective communication with both the mining and project execution teams. Additional responsibilities include preparing realistic weekly plans, compiling production reports, and developing Bench Operating Plans (BOPs).

QUALIFICATIONS:

- Bachelor of Science in Mining Engineering
- Registered as a graduate Mining Engineer by the Engineers Registration Board (ERB).
- The incumbent must have valid Tanzanian driving license.

EXPERIENCE:

- At least 1 year of relevant experience in the mining industry, preferably in open-pit operations, with exposure to other key mine functions such as geology, survey, long-term planning, drilling, and blasting.

ADDITIONAL REQUIREMENTS:

- Proven experience with mining software such as Vulcan, Datamine, SPRY, Rapid Reserver, or associated mining software packages.
- Proficiency in using spreadsheet and database applications, including tools like Microsoft Excel and Access.
- Demonstrated experience in short-term planning within a mechanized open-pit mining environment.
- Strong written and verbal communication skills in English.
- Ability to work collaboratively and maintain effective communication with other departments, sections, and contractors' personnel.

MAIN OR KEY ACCOUNTABILITIES:

- Ensure that Safe Working Procedures (SWPs) are followed for all routine tasks.
- Check achievement of NAF/PAF boundaries as instructed by the Engineer 3 – LT, MT & Projects Planning.
- Demonstrate a teamwork-oriented attitude in the execution of daily responsibilities.
- Assist in the preparation and compilation of weekly plans for the assigned pit in alignment with the monthly plan and present these plans to the execution team.
- Support the preparation of Bench Operating Plans (BOPs) for both short-term and long-term planning purposes.
- Develop Daily Dig Plans to the required standards and distribute them to the production team.
- Utilize Vulcan/Datamine software to perform short-term planning design checks and adjustments, in coordination with the Engineer 3 – LT, MT & Projects Planning, based on pit or stockpile design changes.
- Prepare and maintain spreadsheets for production analysis, option evaluation, and planning strategy development.
- Assist in coordinating planning inputs from various departments such as Geology, Mining Production, Geotechnical, and Engineering for the development of production plans.
- Monitor broken stock levels in the pit and provide timely feedback on any associated risks or opportunities.
- Track equipment performance in terms of productivity and utilization and report findings as directed by the Engineer 3 – LT, MT & Projects Planning.
- Be proactive in promoting operational safety and fostering a strong teamwork culture within the department.
- Perform cost checks on various operational activities as instructed by the Engineer 3 – Short Term Planning.

MODE OF APPLICATION:

- Please apply through our recruitment portal by following the link below. Please click the **link** or type the **URL** address on a website browser to access the application portal.
- On the portal you will be required to upload your detailed CV, copies of relevant certificates, e- mail and telephone contacts, names, and addresses of three referees. Please do not attach certificates that are not related to the qualifications stated above.
- You will also be required to upload a cover / application letter addressed to “Senior Manager Human Resources”, Geita Gold Mining Ltd”. Subject should be “**Graduate Mining Engineer**”.
